

Energon Technology Set to Showcase New Tech at Upcoming Exhibition

March 22, 2021

ATLANTA, GA: Energon Technology, will unveil technological innovations toward environmental sustainability at the Sustainable Tech Exhibition, on Friday, April 2, 2021.

Taking place from 12 PM to 6 PM at the Georgia World Congress Center, Energon and its partners will showcase new technology that is a part of our initiative to create more environmentally sustainable technology. Technology unveiling/demonstrations, presentations on environmental initiatives, student invention showcases, special speakers, and more will be occurring at the exhibition. Speakers such as Elon Musk, Leonardo DiCaprio, and Energon's own CEO will be discussing the importance of environmental sustainability in the technology industry especially in this modern age.

Energon strives to use scientific evidence to work toward a stable climate and is excited to unveil all the new initiatives coming to the company. Event registration is open to employees and their guests along with company guests from our partners. The cost of the event is \$100 per guest and guests can register through the Eventbrite link on our website.

About Energon Technology: Energon creates technology for the masses and ensuring technology is widely accessible and environmentally sustainable is a crucial aspect of its philosophy. Energon works to improve the lives of all through their use of technology to connect them to the world.
